

CASE STUDY

BILLING ENGINE SOLUTIONS FOR A LEADING CASH SERVICES PROVIDER

SBV Services is a leading provider of cash services and solutions in South Africa.

Problems Faced:

SBV had multiple touch points and huge transaction volumes without a consolidated dashboard leading to multiple errors. This also called for constant need for human intervention.

Solution:

Neutrinos implemented an integrated billing capability that ingests inputs from multiple sources in real time.

Applying specific business rules allows for easier, accurate and faster transactions. Subsequent invoicing and reporting leads to better utilization of resources and allows more time for analysis and strategy.

Benefits:

The integrated billing capability substantially reduced the data capture time and significantly improved productivity and accuracy.

Neutrinos is a Low-code Rapid Application & Digital Innovations company that offers a platform to ideate, transform and build complex enterprise applications within days, Sometimes hours.
