

INVENTORY MANAGEMENT FOR THE LARGEST NON-FOOD RETAILER IN SOUTH AFRICA

Edcon is the largest non-food retailer in South Africa, with multiple retail brands. Edgar is one of them having over 37 retail outlets in South Africa.

Problems Faced:

Inventory management was a rather arduous deal for Edcon.

Solution:

A proof-of-concept was created for a Mobile App for Inventory Management, using the Neutrinos Platform

The App was built for Store Managers to check the inventory/stocks available in each outlet. It also involved integration to backend systems and database.

The app was built in 5 Hours

Benefits:

- › Store managers can check the exact stock available at each store.
- › It enabled them to locate the closest stores, based on geo location.
- › Upon selecting a particular store, the user can view the entire inventory available at the store.

Neutrinos is a Low-code Rapid Application & Digital Innovations company that offers a platform to ideate, transform and build complex enterprise applications within days, Sometimes hours.
